RAVIPRASAD

BOARD BIOGRAPHY | TECHNOLOGY, AI GOVERNANCE & ENTERPRISE TRANSFORMATION

Senior Vice President & Head of Technology Unit, Comviva | Bengaluru, India

Board Value Proposition

An enterprise technology and AI executive with nearly three decades of experience translating emerging technologies into commercially accountable transformation. Brings execution-tested perspective to board oversight of Agentic AI adoption, technology investment, cloud transformation, enterprise SaaS strategy and digital business models. Combines technology architecture depth with large-scale business leadership, investment prioritisation, global delivery and ecosystem partnerships.

Executive Profile

Currently Senior Vice President & Head of Technology Unit at Comviva, leading the technology transformation charter spanning Agentic AI, SaaSification and emerging technologies. Working with product leaders to establish reusable Agentic AI orchestration and governance foundations, accelerate AI adoption across software products, and connect technology roadmaps to differentiation and monetisation opportunities. Previously held senior practice and technology leadership roles at Wipro across cloud, platforms, Generative AI, digital engineering and enterprise integration.

Has led technology and business portfolios of approximately $100M–$125M, global organisations of 800+ professionals and multidisciplinary partnerships with enterprise customers, hyperscalers and technology providers. Experience spans telecom, healthcare, insurance, BFSI and retail.

Contribution to the Boardroom

AI & Agentic AI governance Challenge the case for AI investment, autonomy boundaries, accountability, human oversight, model and operational risk, and the evidence required to scale responsibly.

Technology investment & transformation oversight Scrutinise business-case assumptions, programme governance, delivery risk, vendor concentration and value-realisation measures.

Cloud, platform & SaaS strategy Assess modernisation choices, cloud economics, platform architecture, SaaS transition and commercial sustainability.

Product innovation & monetisation Evaluate whether emerging technology roadmaps address material customer needs, create defensible differentiation and generate measurable returns.

Capability, leadership & ecosystem Assess organisational readiness, engineering capability, partner dependency and leadership accountability for technology-led change.

Selected Leadership Evidence

- Led a cloud, platforms and solutions practice with approximately $125M topline responsibility; developed ecosystem-led offerings contributing to approximately 20% year-on-year practice growth.
- Led a GenAI and cloud practice with approximately $100M topline responsibility and an organisation of 800+ professionals.
- Led a global enterprise integration practice with approximately $60M topline responsibility, including API and microservices strategy discussions with C-suite clients.

- Delivered selected digital transformation implementations reporting 50–60% cost reduction and approximately 90% turnaround-time improvement; established an automation centre delivering approximately 160,000 automation hours.
- At Comviva, architected the direction for a reusable Agentic Orchestration Platform and governance foundations; these initiatives are described as ongoing rather than fully deployed at scale.

Career Overview

Comviva Technologies Limited — Senior Vice President & Head of Technology Unit (March 2026–present).

Wipro Technologies — Practice Head, GenAI Strategist / FullStride Cloud (2023–February 2026); Immersive Technologies (2022–2023); Cloud, Platforms & Solutions (2017–2022); Integration Practice (2012–2017); earlier product and digital transformation leadership (2005–2012).

Education & Thought Leadership
